

Saturday 22nd February 2025

0815-1210 Session 3b: Quickfire Registrar Presentations, The Learning Centre

5 minutes with 2 minutes questions

Chairpersons: Anders Wanhainen and Anastasia Dean

- 0815 Case Series of EVAR Patients Treated in a Private Setting in New Zealand**
Tishani Vanniasingham, Mercy Hospital
- 0822 Long-term revascularisation outcomes from the largest regional vascular surgery unit in Australia**
Kevin Tian, Townsville Hospital
- 0829 Aboriginal and Torres Strait Islander Peoples have a unique distribution of peripheral artery disease**
Kevin Tian, Townsville Hospital
- 0836 Twenty-Two Years of Regional Vascular Surgery: A Single Centre Experience**
Oliver Bernau, Waikato Hospital
- 0843 Management of Type B Aortic Dissection in Patients with Prior Endovascular Repair of Abdominal Aortic Aneurysm – a single centre experience**
Emily Overton, Royal Brisbane and Women's Hospital
- 0850 Learning Through Review: Exploring the Educational Value of Morbidity and Mortality Meetings**
Ayushica Saran, Frankston Hospital
- 0857 Management of Seat Belt Related Abdominal Aortic Dissections: Insights from an Australian Tertiary Trauma Centre**
Ayushica Saran, Alfred Hospital
- 0904 Reducing the Risk of Spinal Cord Ischaemia in Complex Thoracoabdominal Aortic Aneurysm Repair: A Novel Endovascular Strategy**
Kelly Feng, Auckland Hospital
- 0911 Blunt thoracic aortic injury within the Auckland region**
Lauren Whearty, Auckland Hospital
- 0918 High risk patients requiring vascular surgery – to operate or not to operate?**
Dhenisha Dahya, Wellington Hospital
- 0925 The Stella Chart: A Size and Technique Guide for Early Childhood Paediatric Arterial Trauma**
Tahmid Zaman, John Hunter Hospital

0815-1210 Session 3b: Quickfire Registrar Presentations, The Learning Centre

5 minutes with 2 minutes questions

Chairpersons: Anders Wanhainen and Anastasia Dean

- 0932 Optimal management of mid-aortic syndrome requires diverse approaches: three cases**
Louis Scarrold, Charles Gairdner Hospital
- 0939 Splenic artery aneurysms, when to treat? A review of the latest evidence, guidelines and approaches to treating splenic artery aneurysms**
Luca Borruso, Royal Prince Alfred Hospital
- 0946 Experiences and outcomes following completely percutaneous endovascular decannulation of patients from venous-arterial (VA) – extra-corporeal membrane oxygenation (ECMO)**
Luca Borruso, Royal Prince Alfred Hospital
- 0954 A preliminary study of patient factors influencing willingness to participate in clinical trials**
Thomas Williams, Christchurch Hospital
- 1003 Preliminary study on the impact of sex on willingness to be randomized in cardiovascular trials**
Pokuan Tu, Christchurch Hospital
- 1010 Management of Patients Colonised with MRSA in a Provincial Hospital: Evidence of Systemic Failure**
Namisha Chand, Taranaki Base Hospital
- 1017 Extra-Anatomic Bypass for Central Venous Occlusion in Haemodialysis Patients– A Single Centre Retrospective Review**
Maarisha Kumar, Townsville University Hospital
- 1024 Carotid Doppler findings in patients undergoing Coronary Artery Bypass Grafting- A retrospective study**
Maarisha Kumar, Townsville University Hospital

1030-1100 Morning Tea and visit trade exhibits

- 1100 Gore TBE with proximal landing into zone 0**
Maarisha Kumar, Townsville Hospital
- 1107 Transcaval Embolization of type-II endoleaks- The Australian Experience**
David Sun, Townsville Hospital
- 1114 Validating three scoring systems for predicting mortality after a ruptured abdominal aortic aneurysm repair in a multicentre New Zealand population* Large regional consecutive dataset of all patients with RAAA over a 12-year period**
Christina Powell, Waikato Hospital

0815-1210 Session 3b: Quickfire Registrar Presentations, The Learning Centre

5 minutes with 2 minutes questions

Chairpersons: Anders Wanhainen and Anastasia Dean

- 1121 Why are females more likely to be palliated when they present with a ruptured aortic abdominal aneurysm? In depth analysis turned down RAAA in particular to females, Maori and AAA morphology**
Jhanvi Dholakia, Waikato Hospital
- 1128 Synthetic biodegradable matrices in diabetic foot wounds: A prospective cohort study of BTM and MTX Prospective consecutive patients with CLTI undergoing BTM & MTX**
Philip Allan, Waikato Hospital
- 1135 Missed opportunities for the clinical or radiological detection of abdominal aortic aneurysms preceding presentation with rupture A retrospective study highlighting that a third of patients with a RAAA had a known AAA either known or not reported**
Jhanvi Dholakia, Waikato Hospital
- 1142 Predictors of a successful consultation: which patients should be picked for an outpatient vascular telehealth appointment?**
Anantha Narayanan, Waikato Hospital
- 1149 Antimicrobial therapy after endovascular treatment for mycotic aneurysms - a national Aotearoa experience and literature review * Insights from the MAA national database**
Philip Allan, Waikato Hospital
- 1156 Is TEVAR a durable option for the young patient in the trauma setting? A long term clinical & radiological analysis of young patients undergoing TEVAR for traumatic injury**
Omar Ayoub, Waikato Hospital
- 1203 Sac Dynamics Post-Endovascular Aneurysm Repair (EVAR): A Review and Analysis**
Summer Hassan, Auckland Hospital
